## Enri

transcription regulatory region sequence-specific DNA bindir

sequence-specific DNA binding transcription factor activity

sequence-specific DNA binding RNA polymerase II transcription factor activity

nscription regulatory region sequence–specific DNA binding transcription factor activity involved in positive regulation of transcription

RNA polymerase II regulatory region sequence-specific DNA bindir RNA polymerase II regulatory region DNA bindir

re promoter proximal region sequence-specific DNA binding transcription factor activity involved in positive regulation of transcription

regulatory region nucleic acid bindir

transcription regulatory region DNA bindir

sequence-specific DNA bindir

regulatory region DNA bindir

protein bindir organic cyclic compound bindir nucleic acid binding transcription factor activity

nucleic acid bindir

heterocyclic compound bindir DNA bindir

core promoter proximal region sequence-specific DNA bindir

bindir

core promoter proximal region DNA bindir
